H. O. SUPERIOR BAKERY

HISTORY OF YOUR H. O. SUPERIOR BAKERY

Typical of the small business establishment is THE COMMERCIAL BAKERY. With the century architecture combined with modern color schemes, such buildings can be found in the industrial areas of most cities and small towns. For this reason the structure is ideal for any Model Railroad, since it can be placed almost anywhere in the scene without loss of authenticity.

The Tall Stack, Ventilating Duct Work and Colorful Bill Boards give this building a distinctive and unique character. Beautifully detailed Brickwork and additional features such as the Light Pole, Trash Bin and Hydrant add to the realism of the structure. Colorful Signs and Lettering add the finishing touch.

FOR BEST RESULTS, READ THIS FIRST

1. Since this kit is molded of styrene plastic, use only cement made for Styrene. Do not let cement touch eyes, furniture or clothing.
2. Apply cement sparingly. Excess cement may run and damage the details on your model.
3. Carefully trim any excess plastic from parts before assembling. This will result in parts fitting together perfectly, and also enable moving parts to move freely.

THIS IS VERY IMPORTANT

4. All parts are numbered for easy identification, or the numbers are engraved on the bar next to the part. Carefully remove each part from its bar only when that part is to be used.
5. The color indicated next to the part is the color the part is molded in. This will help you identify the parts easily.
6. Start with No. 1 and cement it to No. 9 etc.

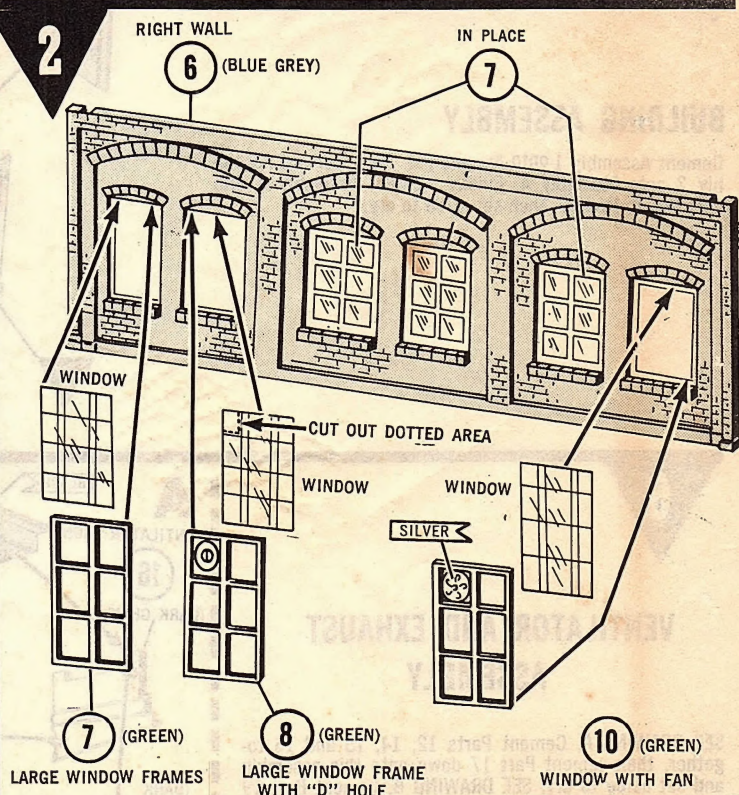

7. With ENAMEL paint set colors, paint all the parts where indicated and allow to dry before assembling. All colors are flagged as shown: **BLACK**

8. Directions for applying Decals are on the back of the Decal Sheet.

LEFT WALL ASSEMBLY

TRIM ALL ACETATE WINDOWS FROM CLEAR WINDOW SHEET AND SET ASIDE. Cement Part 1 onto Part 9. Next, cement Part 2 into Part 9. Now, place (4) Large Acetate Windows into openings, then cement (4) Parts 7 into place. Finally, place Small Door Acetate Window into opening and cement (1) Part 5 into place. Set aside to dry.

RIGHT WALL ASSEMBLY

Place (6) Large Acetate Windows into openings in Part 6, then cement (4) Parts 7, Part 8 and (1) Part 10 into place, as shown. Set aside to dry.

REAR WALL ASSEMBLY

Place remaining Small Window into opening, then cement remaining Part 5 into place. Finally, place Double Door Acetate Window into opening in Part 3 and cement Part 18 into place. Set aside to dry.

BUILDING FRONT ASSEMBLY

Place (3) Large Acetate Windows into openings in Part 11. Next, cement (2) Parts 7 and remaining Part 10 into openings, as shown. Finally, cement Clear Door Acetate Window to back of Part 4, then cement completed Door into opening in Part 11. Set aside to dry.

BUILDING ASSEMBLY

Cement Assembly 1 onto Assembly 4. Next, cement Assembly 2 onto Assembly 4. Finally, cement Assembly 3 into Assemblies 1 and 2, then set aside to dry.

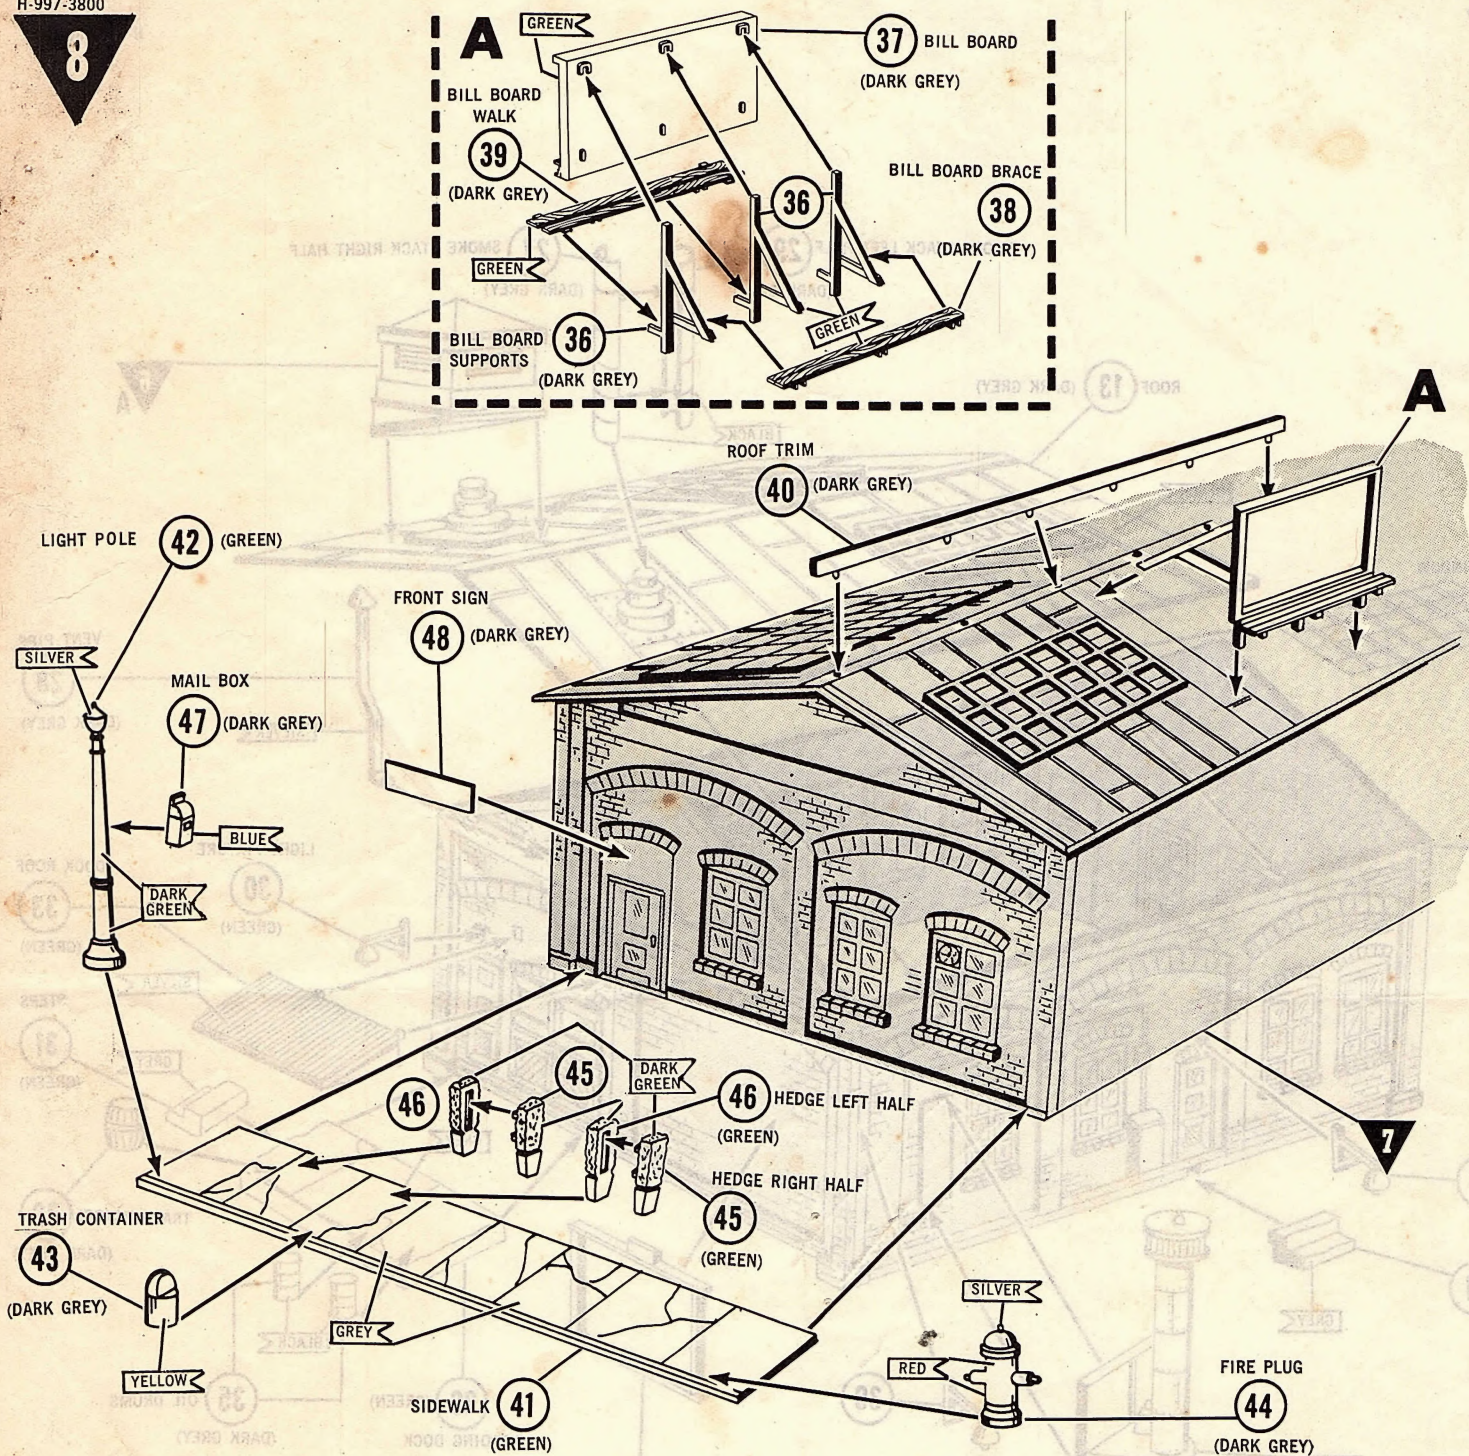

SEE DRAWING A. Cement Parts 12, 14, 15 and 16 together, then cement Part 17 down onto this assembly and set aside to dry. SEE DRAWING B. Cement Part 19 down onto Part 20. Next, cement Parts 21 and 22 together, then cement assembled Motor down onto Part 19. Now, cement Parts 23, 24 and 25 together, then cement completed Exhaust Stack down onto Part 19. Set aside to dry.

ROOF AND REAR BUILDING ASSEMBLY

Place (2) Large Acetate Windows into openings in Part 13, then cement Part 13 down onto Assembly 5. Now, cement Parts 27 and 29 together, then cement completed Smoke Stack down onto Roof, as shown. Next, cement Assembly 6A to the Roof. Cement Part 28 into Window with "D" hole in Right Wall, also apply cement to Stack where it touches edge of roof. Cement (1) Part 30 to Rear Wall at location shown, then cement Part 33 to Assembly 5.

Now, cement Part 28 to Assembly 5. Next, cement (1) Part 31, Part 32 and (2) Parts 35 onto Part 26. Cement Part 34 to Assembly 5, as shown. Next, cement Assembly 6B to the Left Wall at location shown. Finally, cement remaining Parts 30 and 31 to the Left Wall and set aside to dry.

FINAL ASSEMBLY

SEE DRAWING A. Cement (3) Parts 36 to Part 37. Next, cement Parts 38 and 39 to (3) Parts 36, as shown, then set aside to dry. SEE MAIN DRAWING. Cement Part 40 down onto Roof. Next, cement Assembly A to Roof at location shown or as you wish. Now, cement Part 41 to front of Assembly 7. Cement Parts 42, 43 and 44 down onto Part 41. Next, cement (1) Part 45 to (1) Part 46. Make (2) Sets. Cement

completed Hedges to each side of Front Door down on Part 41. Now, cement Part 47 to Light Pole. Cement Part 48 to Assembly 7 above Front Door. Apply Decals and Signs to your model at locations shown in the pictures on your Kit Box Cover. Finally, your model may be painted as suggested after cement has been allowed to dry thoroughly.
